## **RESPONSIBILITIES**

Caroline is a Senior Consultant at NJL Consulting LLP responsible for the management and coordination of Environmental Impact Assessments and providing advice in respect of all environmental related planning matters, sustainable development and Strategic Environmental Assessment.

## **EMPLOYMENT TRACK RECORD**

Caroline has been at NJL since 2005, in this time she has been responsible for coordinating a number of Environmental Impact Assessments (EIA) for large scale residential and mixed use developments. Caroline has also produced, reviewed and advised on Sustainability Appraisals and Strategic Environmental Assessment (SEA).

Prior to joining NJL, Caroline was employed with Environmental Resources Management (ERM) where she worked on a range of EIA developments, SEA Reports and large scale transport infrastructure projects including Merseytram and the Edinburgh Airport Rail Link.

## **PROFESSIONAL EXPERIENCE**

Caroline has a number of years professional experience in the field of environmental assessment and management including a further four years studying in Environmental Biology and a Masters degree in Environmental Assessment and Management. For her Masters, Caroline was part of a team undertaking pilot studies on the application of SEA to local development plans.

Throughout this time, Caroline has gained considerable experience, specifically, this has included:

- Managing and co-ordinating EIAs for a range of different developments with particular focus on residential and mixed use developments.
- Production of Environmental Statements in support of complex planning applications with emphasis on technical quality, concise approach and good presentation.
- Project management of large applications including implementation of Planning Performance Agreements with Local Authorities and key stakeholders.
- Advice in respect of EIA applications and legal compliance with the EIA and SEA Directive and UK Habitats Regulations.

- Advice on all environmental planning related matters, with particular focus on sustainability policy, meeting local authority requirements, producing Sustainability Appraisals and Statements.
- Understanding the procedures and technical assessments required under the Code for Sustainable Homes and BREEAM in particular the emerging BREEAM Communities scheme and sustainable masterplanning.
