

**Laurie Wills BA (Hons) AIEMA  
Senior Sustainability Consultant**

**Tel:** 0845 362 8206  
**E-fax:** 0870 130 5579  
**Email:** [laurie@njlconsulting.co.uk](mailto:laurie@njlconsulting.co.uk)  
**Web:** [www.njlconsulting.co.uk](http://www.njlconsulting.co.uk)

## **RESPONSIBILITIES**

Laurie is a Senior Consultant at NJL Consulting LLP providing sustainability and design advice as well as technical compliance services.

## **EMPLOYMENT TRACK RECORD**

Laurie joined NJL in 2010 to support the Sustainability team.

Prior to this Laurie had worked in Manchester for 5 years for RSK Group with a year spent at Geodelft Environmental in Cheshire. He is an experienced project manager with knowledge of contaminated land and site investigation, asbestos surveying, sustainable construction issues, carbon management and building energy modelling.

## **PROFESSIONAL EXPERIENCE**

Laurie has experience in many aspects of sustainable development and environmental consultancy. He has developed his broad knowledge of sustainability issues with specific focus upon sustainable construction.

Project experience in this area can be summarised as follows:

- BREEAM and Code for Sustainable Homes assessments
- Material specification and design reviews
- Building energy modelling (SAP & SBEM) & provision of EPCs
- Low carbon / renewable energy strategy & feasibility studies
- Sustainability statements
- Delivery of sustainability training courses to industry professionals
- Carbon footprint assessments & life cycle analysis

He has delivered numerous projects ranging from small, bespoke developments to large master planning submissions including conceptual design stage advice through to operational site appraisals. Additionally, he has developed and project managed the delivery of an online sustainability appraisal toolkit, which guides the construction manager through the RIBA stages by flagging environmental and associated commercial risk issues.

Laurie has experience of site investigations for housing and commercial developments including phase 1 and 2 contaminated land surveys, borehole drilling and sampling with a particular focus on hydrocarbon contamination. He is also a qualified lead asbestos surveyor having conducting numerous surveys for residential and commercial sites and was responsible for managing asbestos risk within large national property portfolios.
