RESPONSIBILITIES

Rob is a Partner at NJL Consulting LLP providing specialist technical advice on all phases of development and also leads the Sustainability team.

EMPLOYMENT TRACK RECORD

Rob joined NJL in 2005 to set up and lead the Sustainability team.

Prior to this Rob had worked in Manchester for 5 years for ERM and Waterman Environmental, Environ in London for 5 years, with a year spent at URS in Melbourne.

PROFESSIONAL EXPERIENCE

Rob has a wide range of experience of technical issues associated with all phases of the development cycle, with more recent experience in resolving Sustainability issues as these have become more prominent in the UK.

Main areas of experience include:

- Environmental Impact Assessments
- Environmental Planning and Project Management
- Sustainability Appraisals
- EcoHomes Code for Sustainable Homes and BREEAM Assessments
- Ground Contamination and Remediation

He has been part of project teams for developments including landmark office developments; major regeneration schemes; a range of strategic residential developments; mixed-use schemes; transportation infrastructure projects including ports, airports and light and heavy rail schemes; renewable energy projects; incinerator projects.

In addition he has undertaken reviews of assessments of draft plans and policies for local government.

Rob has advised a broad range of clients including property investors and developers; leading housebuilders; transport authorities; Local Authorities; energy providers; and utility companies.

Rob has also provided technical advice and produced review papers to bodies such as the Home Builders Federation and local authorities, as well as private clients.

He has appeared as an expert witness to planning hearings, appeals and inquiries and provided a pre-inquiry review service to tighten up submissions by others.

Project experience has been gained throughout all parts of the UK from London to the West Coast of Scotland, East Anglia to South Wales on brownfield, greenfield, city centre, suburban and industrial sites.
